

LORINE AROKO

"I'm Lorine Aroko, 20 years old, I joined STADA KENYA early this year. I am among the teen mum that have benefited in the teens mum project. Being a teen mum out here is not easy it comes with a lot of responsibilities and a lot of challenges. I did not expect to get a child at a young age but it happened and I had to face it despite all the challenges it comes with.

I was shocked and afraid not knowing how my future will be. I was discouraged and hopeless. STADA came through for me and I was able to finish my primary education. After my primary school education, they took me avocational training that I am undergoing right now. I also do a party time job after school in STADA KENYA. I'm happy for the transformation that I have undergone from a teen mum to a young mother full of hope and dreams to achieve all thanks to STADA KENYA.

They have help mentally, physical and emotionally. I am able to maneuver through motherhood with confidence and a purpose in life. To all young mother out there don't loose hope life must continue and we as young mothers we must have a purpose in this life for thing to move smoothly.

To STADA KENYA Thank you for helping young girls like me and I will be more grateful if you extend the program to more girls like me so that they can have a future to smile about".
